Single & Double Centre Pillars
(CHROME ONLY)

- CP-C (Single)
- DCP-C (Double)

MAKE IT SQUARE

FINISHES

- Chrome Plated Matte Black
- Brushed Gold Brushed Nickel

Why Choose Master Rail

Unlike traditional 1–2 screw systems that loosen over time, Master Rail's 4-POINT FIXING delivers a permanent hold.

Bathroom accessories shouldn't just look refined — they should perform for years to come.

Master Rail is engineered to eliminate the common failure points found in traditional fittings. No loose rails. No visible fixings. No compromises.

Our signature 4-point fixing system delivers superior strength and long-term stability. Once installed, your rail remains secure, straight, and built to last.

With no grub screws or exposed brackets, the fully concealed mounting system creates a clean, architectural finish suited to modern bathrooms.

Designed for flexibility, Master Rail allows you to customise your space with interchangeable round or square cover plates and adjustable rail lengths.

From premium materials to precision manufacturing, every detail is considered for durability, performance, and timeless design.
